

RUPLAN

POWERFUL BRANCH PACKAGE

**EVU Module – The Complete Electrical
Documentation for Power
Supply Companies**

Short description of the features:

The RUPLAN EVU module is a branch package adapted to the working practice of electric utilities for documenting electrical systems.

It takes into account the requirements of power distribution (designation according to DIN) and power generation (KKS designation) in equal measure.

The EU module consists of:

- Projecting guideline
- Symbol and object library
- Evaluation library
- Routines for checking the compliance with the projecting guideline

The features offered by the EVU module as well as further developments are defined by a study group consisting of power companies, plant manufacturers and engineering companies and are realized by AUCOTEC GmbH

Scope of delivery:

- Projecting guidelines (1 folder)
- Symbol database + PDF documentation on CD
- Object database + PDF documentation on CD
- Form database
- AWT database
- Sample project for DIN application
- Sample project for KKS application
- Special installation file

System requirements:

- Same system requirements as for RUPLAN
- RUPLAN license
